OR GEOG 2215 Intro to GIS Mapping			
*HESC 5188 Contemporary Health Problems	3	H	Yes
Total Hours	15		

Notes:

* Denotes example and is subject to student interest

Additional Notes:

1. To count toward graduation all grades must be "C" or better.
2. Many graduate programs require an entrance examination. Students should take this exam prior to applying for graduate programs.
3. Students should work with their advisor to ensure all required courses are taken for the graduate program of choice.
4. May require biostatistics course-not currently offered.

PHED 1205 is required for all students unless they are over the age of 40, a prior military service member, or have a documented disability.

This program map illustrates appropriate coursework for completing a degree within four years, provided that course grades allow for earned credit. Please consult with your advisor to determine when courses can be switched out with others and taken in a different semester or sequence than illustrated since not all courses are taught every semester. A Freshman Learning Community (FRLC 1116) or a First-Year Seminar (FYRS 1105) is required of all students entering either as new freshmen or with fewer than 30 hours of transferred credit, so please talk to your advisor about this requirement. This map is for illustrative purposes only and does not constitute a legal contract on the part of CSU since degree requirements or course offerings could change. As always, check with your advisor.
